## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/05/02 has been entered.

The amendments filed on 12/05/02 and 02/22/03 has been acknowledged.

*Claims 1-8, 10-18, 21-100 are pending and are examined in this office action.*

► *Applicants are advised to follow Amendment Practice under revised 37 CFR §1.121 (<http://www.uspto.gov/web/offices/pac/dapp/opla/preognotice/revamdtprac.htm>). Each amendment document that includes a change to an existing claim, or submission of a new claim, **must include a complete listing of all claims** in the application. After each claim number, the status must be indicated in a parenthetical expression, and the text of each claim under examination (with markings to show current changes) must be presented. The listing will serve to replace all prior versions of the claims in the application.*

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, 10-18, 22-32, 49-74, 75-100 are drawn to a method of treating a mammalian subject to inhibit restenosis of a blood vessel by administering to the subject a composition comprising a polynucleotides (SEQ ID NO:1) that encodes a VEGF-C polypeptide (SEQ ID NO:2), classified in class 514, subclass 44.

Art Unit: 1636

- II. Claims 21, 22-32, 33-48 49-74, 75-79, 83-100 are drawn to method of treating a mammalian subject to inhibit restenosis of a blood vessel by administering to the subject a composition comprising a polynucleotides (SEQ ID NO:3) that encodes a VEGF-D polypeptide (SEQID NO:4), classified in class 514, subclass 44.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are distinct. Inventions are distinct if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In instant case the VEGF-C (SEQ ID NO:1 encoding the amino acid sequences SEQ ID NO:2) and VEGF-D (SEQ ID NO:3 encoding the amino acid sequences of SEQ ID NO:4) are structurally and functionally distinct polypeptides which have different modes of operation, different functions, and/or different effects. Furthermore searching of group I would not fully anticipate the subject matter of group II and therefore would require additional search. For example, search of a nucleotide sequences encoding VEGF-C would not anticipate the nucleotide and/or polypeptides encoding the VEGF-D. Thus these inventions are distinct and are of separate uses.

Claims 22-32, 49-79 and 83-100 are generic to a plurality of disclosed patentably distinct inventions comprising VEGF-C and VEGF-D. Should any group I or II elected, claims 22-32, 49-79 and 83-100 will be examined only to the extent that they encompass the elected subject matter

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1636

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
